# Justin *Fowler*

*Salesforce operator* building production AI infrastructure — from autonomous Apex / LWC pipelines on the day job to multi-agent systems running on local hardware. Co-founder of *PurpleChipmonk*, an 18-skill agentic OS for the modern job search.

§ 01

## Summary

**I do the unsexy work, made faster.** Salesforce administration on a 59-package production org with full ISO 27001 / 27701 compliance lane, plus an eight-agent autonomous metadata pipeline — Apex, LWC, test classes, deployments — drafted overnight and reviewed in the morning. Zero browser interactions; everything goes through JWT, API, or CLI.

Outside the day job, I run *multi-agent systems on real hardware*. Three named agents (Alpha · Beta · Gamma) plus a coding agent on an M3 Ultra with native

Ollama. A nightly cloud-triggered RevOps build agent that picks the highest-scored phase from a roadmap and ships PRs to `main`. A version-controlled "personal AI OS" (*fowler-brain*) where every Claude / Cursor / local-model surface bootstraps from one git repo.

Co-founded **PurpleChipmonk** — a Next.js 15 + Supabase + Claude Sonnet 4.6 SaaS — with a binary 90-day kill-or-scale gate. Built nine quality gates between LLM and user to prevent the failure modes that make raw GPT tools dangerous. *Operators over thought leaders. Compound assets over one-time wins.*

---

§ 02

# Selected *experience*

DAY JOB · ENTERPRISE  SALESFORCE + AI DELIVERY  2024 — PRESENT

## Salesforce Admin · IT Lead — *ClearSpeed*

San Diego–based voice-analytics company. Production + sandbox orgs with 59 managed packages. Lead admin on the security/compliance lane (ISO 27001 + ISO 27701).

- → Designed and deployed Contract lifecycle flows (Stage Validation, Renewal Counter, Expiration Alert, Target Start Date) with sandbox-aware email guards
- → Built an eight-agent autonomous metadata pipeline — Apex / LWC / test classes / deploys — drafted overnight via Claude Code + Atlas Direct, reviewed in the morning
- → OAuth / JWT / SF CLI / Tooling API only — zero-browser policy for repeatable, auditable change
- → Runs full audit-trail observability via SetupAuditTrail SOQL pipeline + GitLab CI for SFDX repo, Doppler-routed credentials

CO-FOUNDER · LIVE PRODUCT  LIFESTYLE SAAS  APR 2026 — PRESENT

## Co-founder · *PurpleChipmonk* (purplechipmonk.com)

50/50 co-founder with Zach Berenzweig. Lifestyle business — not raising, not optimizing for exit. Binary 90-day gate: 10 paid customers at list price by July 31, 2026 determines kill-or-scale.

- → 18-skill agentic OS for the modern job search · Next.js 15 · tRPC · Supabase · Claude Sonnet 4.6 · Voyage AI embeddings · Stripe · Vercel
- → Nine quality gates between LLM and user — prevents resume fabrication, comp-math errors, persona mismatch, fabricated experience claims
- → Launched April 21, 2026 with binary 9/9 launch checklist · PostHog telemetry · Sentry-bridged structured error logs
- → Authored full GTM operating doc — pricing strategy memo, partner alignment memo, channel ranking, launch checklist, weekly cadence

PERSONAL INFRASTRUCTURE  MULTI-AGENT · LOCAL-FIRST  2026 — PRESENT

### Operator · *OpenClaw HQ*, *Atlas Direct*, *Atlas3*, *fowler-brain*

A stack of named systems that compose into something larger than any one of them. All running on hardware I own. All US/EU model-origin only. All version-controlled, lessons-graduating, drift-reviewed weekly.

- → **OpenClaw HQ** — three-tier multi-agent platform · BullMQ + Redis + pgvector · M3 Ultra · 96 GB unified memory · production-grade local inference
- → **Atlas Direct** — autonomous RevOps build agent · nightly cloud trigger · scored ROADMAP · ships PRs to `main` · ~70 phases planned
- → **Atlas3** — local Aider-based coding system · FastAPI service · compliant model stack (Mistral · Meta · Microsoft only)
- → **fowler-brain** — version-controlled personal AI OS · 21 lessons captured · 11 workflows · 8 adapters · Saturday automated coaching review

§ 03

## Capabilities *by domain*

01 · SALESFORCE

### Production-grade admin + platform engineering

Apex · LWC · SOQL · Flow Builder · jsforce · SF CLI · SFDX · Tooling API · External Client

02 · COMPLIANCE + IT

### Security and audit lanes that hold up under review

ISO 27001 · ISO 27701 · SOC 2 alignment · OAuth / JWT · Doppler · GitLab CI · Audit

Apps · Metadata API

trail observability · Least-privilege OAuth split

03 · AGENTIC AI

### Multi-agent systems, in production

Claude Sonnet 4.6 · Claude Code · Aider · Ollama (native) · BullMQ · pgvector · MCP servers · skill design · LLM tool-use validation

04 · WEB + PRODUCT

### Shipping a real SaaS, not a side project

Next.js 15 · TypeScript · tRPC · Supabase · Postgres + RLS · Stripe · Vercel · Voyage embeddings · PostHog · Sentry

05 · LOCAL AI INFRA

### Serious models on hardware you own

M3 Ultra · 96 GB unified · native Ollama (no Docker) · ngrok tunnels · launchd · Redis · Postgres · ComfyUI · complexity-scored routing

06 · STRATEGY + GTM

### Operating documents, not slideware

Five-year P&L · unit economics · CPG channel modeling · GTM design · 90-day binary gates · investor decks · partner agreements · pricing memos
